

Amendments to the Specification

ABSTRACT OF THE DISCLOSURE

The present invention provides a A method of printing and distributing time sensitive documents. The method of printing includes receiving an intended delivery location with each of a plurality of documents, determining a time required to deliver each document to the intended delivery location, determining a desired date of receipt and printing each document to allow for the time required to deliver each document on the desired date of receipt. Moreover, each document can be printed in-line with a corresponding shipping label. The documents and shipping labels may be customer specific. The shipping labels can also be secured to the documents, by stapling, binding, gluing or any other means, in-line to avoid many problems.
